Acknowledgements

The study team is grateful to the Ministry of Development of North Eastern Region (MDoNER), Government of India, for providing the opportunity to undertake 'Study of Studies'. The study could not have been contemplated and conducted without the support of Dr Inder Jit Singh, Secretary, MDoNER.

The study team conveys sincere thanks to Dr Chandramani Sharma, Statistical Adviser; Shri Purushottam Verma, Deputy Secretary; Shri Sunil Kumar, Assistant Director, Shri Ram Dayal, Senior Statistical Officer and Shri Sunil Kumar, SSA, MDoNER for their invaluable guidance, inputs, and cooperation.

'Study of Studies' in its present form would not have been possible without project investigators, heads of various scientific and academic institutions, ministries and departments of Government of India as they provided team with invaluable inputs such as relevant reports and data with respect to studies conducted in the context of North Eastern States during the period of study—January 2010 to June 2020.

Special thanks to the project team members for their indulgence, commitment, and hard work they invested in carrying out on surveying, collecting, compiling, and authenticating data from various sources located across the country. We extend our gratitude to TERI administrative professionals for their contribution towards the timely mid-term completion of the study.

Agriculture & Allied	Food security, farming and cultivation of crops, plants, soil, animals, fungi, medicinal plants and other related studies, forestry, fishery/aquaculture/ pisciculture, horticulture, sericulture, animal husbandry, jhum, food processing.
Banking and Finance	Financing, Rural Banking, Lending, Loans, Credit facilities and other economic activities.
Commerce and Industry	Service activities viz., Transport, Communication, Warehousing, Banking and Insurance, International trade, Small and Middle Scale Enterprises (SMSE).
Completed Studies	Sponsored studies in various sectors relating to the North Eastern Region completed between January 2010 to June 2020.
Energy	Energy Efficiency, Renewable Energy, , Energy Science.
Environment	Studies related to Climate Change, Biodiversity, Land, Water, Forests, Pollution, Population, Waste Management, Natural disasters, Environmental health, Natural resources, mineral resources, Man-made disasters.
Extramural Research Projects	Sponsored or funded studies/projects in various sectors relating to the North Eastern Region.
Funding Agencies	Ministries and Departments of Central Government, Multi-/bi-lateral Organizations, State Government Departments who have sponsored studies relating to the North Eastern Region.
Health and Nutrition	Health and development, child and maternal health, pregnancy, Improving living conditions, quality health care services and nutrition to the women and children, non-communicable diseases, poverty and malnutrition, healthcare infrastructure, healthcare system, healthcare services, access to healthcare services, indigenous healthcare practices.

Human Resource Development	Employment, HR in Infrastructure industries, Higher education recruitment, Human resources in Science & Technology, Manpower Estimation, Manpower Management, Personnel Management, Productivity of Manpower, S&T Professionals, Scientific and Technical Manpower, Technical education such as medical, Engineering, Training and skill development programmes.
Implementing Institutions	Studies related to NER carried out by universities, medical colleges and hospitals, national research laboratories, scientific and industrial research organizations during the period 2010 to 2020.
Infrastructure	Transportation systems, communication networks, rail, road, sewage, water, electric systems, waste management, inland waterways, airways, road construction, cold storage system.
Law & Governance	Studies related to law and governance, access to justice, human dignity and well-being, economic and social development, indigenous and tribal laws/ customary laws.
MDoNER	Ministry of Development of North Eastern Region, Government of India.
Meta Data	Summarizes basic information about each study, viz. study title, start and end dates of the study, implementing institution, funding agency, study objectives, location, recommendation.
North Eastern Region (NER)	The present study covers eight North Eastern States viz., Arunachal Pradesh, Assam, Meghalaya, Manipur, Mizoram, Nagaland, Sikkim and Tripura.
On-going Studies	Refer to sponsored studies in various sectors relating to the North Eastern Region not yet completed as of June 2020.
Principal Investigators (PIs)	Primary individual responsible for the preparation, conduct, and administration of a research grant, cooperative agreement, or other sponsored studies.
Recommendations	Recommendations in the context of the present study are based on the results of the sponsored studies/research. These indicate specific measures or directions that can be taken in future.

Rural Development	Studies refer to social, economic, political and spiritual development of the people living in rural areas. Also studies related to management of rural resources – including planning and executing rural development programmes that benefits the rural livelihood. Self-help groups (SHGs), community development, government schemes and programmes such as MGNREGA, etc.
Science & Technology	Studies related to Science and Engineering Research, Technology Development, S&T Communication; S&T infrastructure, S&T Entrepreneurship, S&T Cooperation; GIS, Spatial Data Infrastructure, policies and practices. S&T at the State, District, and village levels for grass-roots development, Application of S&T for weaker sections, women and other disadvantaged sections of Society. Geotechnical mapping, geochemical mapping, remote sensing, survey, laboratory research, innovation, prototype design, explorations.
Sectors	Refer to studies conducted in various broad subject areas viz., i) agriculture and allied, ii) banking and finance, iii) commerce and industry, iv) energy, v) environment, vi) health and nutrition, vii) human resource development, viii) infrastructure, ix) law and governance, x) rural development, xi) science and technology, and xii) tourism.
Tourism	Rural tourism/tourism infrastructure development, medical and wellness tourism, travel trade, human resource development for tourism, sanctuaries, wildlife parks, ecotourism, art, culture and festivals, music, sacred groves, mysticism, religion and spirituality.

1.0 Executive Summary

North Eastern Region (NER) of India consists of eight states, namely (i) Arunachal Pradesh, (ii) Assam, (iii) Meghalaya, (iv) Manipur, (v) Mizoram, (vi) Nagaland, (vii) Sikkim, and (viii) Tripura. The Region is endowed with immense natural resources, accounting for 34% of the country's water resources and nearly 40% of India's total hydropower potential. The location and natural resources make NER a potential powerhouse of India, much required for country's growth and development. In the light of the mentioned facts, it can be established that the North Eastern states are blessed with the prerequisites to scale-up the growth and development of their natives which in turn will help drive the GDP growth of India.

For the last few decades, Government of India has been giving due attention to NER with the aim of enhancing the developmental activities and to uplift the socio-economic conditions of the people, inhabiting the Region. Many studies pertaining to NER have been completed by various organizations, agencies, government, non-governmental organizations (NGOs), individuals, and many more in various sectors. Despite many studies conducted for the Region, it was observed that still many proposals keep coming for further studies on similar or related subjects. Hence there is an urgent need of an information system and database of the ongoing and completed studies that can play a pivotal role in monitoring developmental programmes, impact analysis and, proper allocation of the funds for the studies in NER.

Against this background, the Ministry of Development of North Eastern Region (MDoNER), Government of India, has sponsored a study titled 'Study of Studies' to The Energy and Resources Institute (TERI), New Delhi [study start date: 27 January 2021 | study end date: 26 November 2021]. The study is aimed at listing out and compiling the various studies conducted during January 2010 to June 2020 period in various sectors in the context of North Eastern states, and analyse and compile the recommendations of such studies, which would be useful for MDoNER in various policy and decision-making purposes.

The first phase of this study (27 January to 26 June 2021) is dedicated for (i) collection and compilation of all completed and ongoing study reports, (ii) preparing a master database of all studies, and (iii) categorization/organizing these studies by sectors, subjects, areas, states, agencies who conducted sponsored/funded such agencies, time period, etc. The second phase of the study (27 June to 26 November 2021) will focus on the analysis, compilation and consolidation of recommendations of such studies on the basis of sector/subject/area/state.

Accordingly, the study team conducted the study reports collection exercise. It contacted principal investigators and heads of implementing institutions and funding agencies for the purpose. A total of 1050 studies (900 completed and 150 ongoing) were identified. Soft copies of 900 completed study reports were collected, compiled, and organized in a specially developed MS-Excel-Database with relevant meta data including sectors, sub-sectors, objectives, and recommendations (a list of all study reports in Excel format is attached).

2.0 Objectives

The proposed study envisages to list out and compile various studies done so far in various sectors in the NER and accordingly analyse and compile the recommendations of such studies, which may be utilized at various policy and decision-making levels. In order to develop a centralized repository of research studies pertaining to the NER, the MDoNER has sponsored the study titled 'Study of Studies' to The Energy and Resources Institute, New Delhi for implementation.

The objective of the study is to collect and compile the recommendations of similar studies conducted by various institutions, agencies, government, NGOs, and individuals in various subject-specific sectors, for policy and decision-making purposes and for the benefit of the scientific community.

3.0 Scope of the Study

- Prepare a complete master database of the studies conducted during 2010 to 2020 period.
- Categorize/organize these studies on the basis of subjects/sectors/states/areas of study/agencies.
- Study and analyse the actions taken on the recommendations of such studies/present status of implementations of such recommendations and reasons for non-implementations etc.
- Study and analyse the feasibility/practicability of implementation of the recommendations of such studies, to list out implementable recommendations along with the pre-conditions required for implementing these and agencies responsible for implementation.
- Analyse the outcomes of these studies using appropriate statistical techniques.
- Assess the usefulness of such studies.
- List out areas/sectors in which no worthwhile studies have been conducted in the past 10 years and suggest such areas/sectors which require detailed studies in future.

4.0 Methodology

At the project start-up, the team developed an initial plan with potential approaches for data collection, consolidation, analysis, timeline and actionable steps briefed here.

4.1 Identification of studies

The foremost step of study was aimed at development of a catalogue of studies in accordance with the objectives. It identified a total of 1050 sponsored studies pertaining to the NER from the following key sources:

- i. The National Science and Technology Management Information System (NSTMIS) Digital Repository: This database, developed by TERI, contains details of over 1.25 lakh completed Extramural R&D Projects funded by the departments and ministries of Government of India including studies conducted by Department of Science & Technology (DST), Department of Biotechnology (DBT), North Eastern Council (NEC) etc. This greatly helped the team to reach out to the study-implementing agencies.
- ii. North Eastern Council's Online Database: OASIS (Online Approvals and Sanctions Information System) and the NEC Library.
- iii. Websites of Central Government Ministries/state government departments and agencies, international agencies, for instance, United Nations Development Programme (UNDP), the World Bank, Asian Development Bank and academic institutions, among others.

4.2 Study Reports Collection

4.2.1 Survey questions for data collection

Questions related to completed studies were prepared keeping in view the objectives of the study. The questions included (i) title of study, (ii) name and contact address of principal investigator, representing the implementing institution, (iii) funding agency, (iv) year of sanction, and (v) date of completion of the study. The questionnaires were sent to implementing institutions for reports collection.

4.2.2 Coverage of study-implementing institutions and sponsoring agencies

The target group for study reports collection were principal investigators representing academic and research institutions and heads of funding agencies, such as autonomous bodies and public sector undertakings, Central Government Departments, multi-/bi-lateral organizations, state government departments.

The reports collection was carried out in two phases:

Phase I – Preparatory survey: The questionnaires with respect to 650 study reports were forwarded to the respective principal investigators and heads of departments of academic and research institutions/universities, along with an authorization letter from the MDoNER, via both email and courier.

Phase II – Reports collection phase: In this phase, survey was conducted partially through field visits and in-depth interactions and interviews with principal investigators/nodal officers/heads of institutions for carrying out reports collection exercise. These institutions consisted of universities, medical colleges and hospitals, national research laboratories, scientific and industrial research organizations. Full-text reports were also collected from the websites of international agencies, notably, the UNDP, the World Bank, Asian Development Bank and national-level research and academic institutions.

4.3 Conversion of Print/Soft Copy of Study Reports

The study reports obtained in the print or MS Word formats were converted into searchable PDF through a high-end scanner machine.

4.4 Development of Database and Metadata entry of Study Reports

Keeping the objectives of the current study in view, a well-structured metadata structure has been designed in MS Excel that contains 23 metadata fields, including study title, start and end dates of the study, implementing institution, funding agency, study objective, location, recommendation, among others (Table 1). These reports have been classified with one of the 12 broad subject sectors identified for the purpose: i) agriculture and allied, ii) banking and finance, iii) commerce and industry, iv) energy, v) environment, vi) health and nutrition, vii) human resource development, viii) infrastructure, ix) law and governance, x) rural development, xi) science and technology, and xii) tourism. Majority of these sectors are further divided into relevant sub sectors for the purpose of conducting analysis during the second phase of the study.

5.0 Data Collection Status

Table 1: Metadata fields

1	Title of Study	9	Implementing Institutions	18	Sector
2	Study awarded date	10	Category of Organization/ Institutions	19	Sub-sector
3	Study Completed date	11	Name of PI	20	Study Location

7	Contact officials	15	E.mail ID of organization		
8	Funding Amount (Rs. In Lakh)	16	Contact No. of PI		
		17	E.mail ID of PI		

In the first four months, the data collection task was assigned to a team of professionals who explored all the sources of information to collect the reports. During COVID-19 pandemic our data collection team collected more data from open source domain rather than through direct communication with the concerned organizations and project investigators.

Information of 1050 studies has been collected, which includes 900 completed studies (Annexure 1) and 150 ongoing studies (Annexure 2). Soft copies of 900 completed studies have been collected and saved in PDF format. A database of 1050 studies has been developed through MS Excel. Metadata of each study report has been collected and filled-up by studying the reports.

6.0 Data Collection Facts and Findings

6.1 Most of the studies focused on environment, agriculture and allied sector

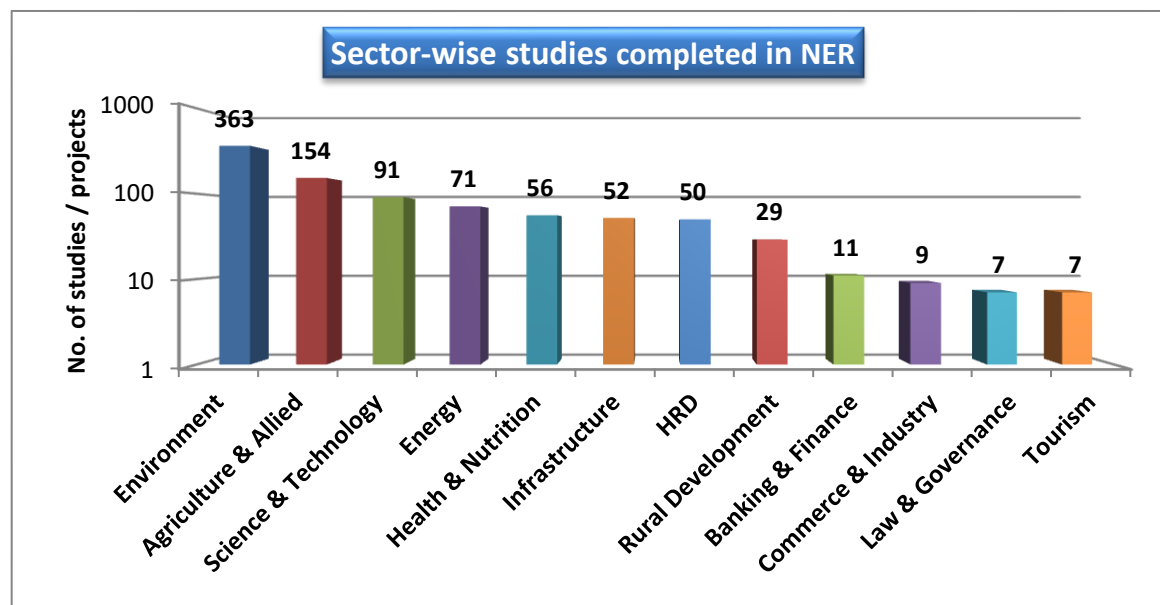

After developing a database of all the collected study reports, some of the interesting facts came into light that during the last 10 years' period (from January 2010 to June 2020) the highest number of studies/projects have been awarded to environmental sector, followed by agriculture & allied sector, science & technology and energy sector. Out of 900 completed studies, 363 studies have been dedicated to environment sector; 154 studies are based on agriculture & allied sector; 91 studies on science & technology and 71 studies have been carried out under energy sector. As NER is known for its tourist destination in India, this requires substantial investment in studies for expansion of the activities and infrastructure development in tourist sector. As per the data collected in this study, only 7 studies have been conducted in the past 10 years in the tourism sector (refer to Table 2 and Figure 1).

Table 2: Number of studies conducted in different states under various sectors

Sectors	Arunachal Pradesh	Assam	Manipur	Meghalaya	Mizoram	Nagaland	Sikkim	Tripura	More than one state	Grand Total

Grand Total	77	215	43	162	65	71	64	58	145	900

One important finding that comes out from Table 1 is that majority of studies have been awarded on state-specific basis, however, environment studies have been conducted in more than one state (refer to Annexure 1A: List of Studies Sector Wise).

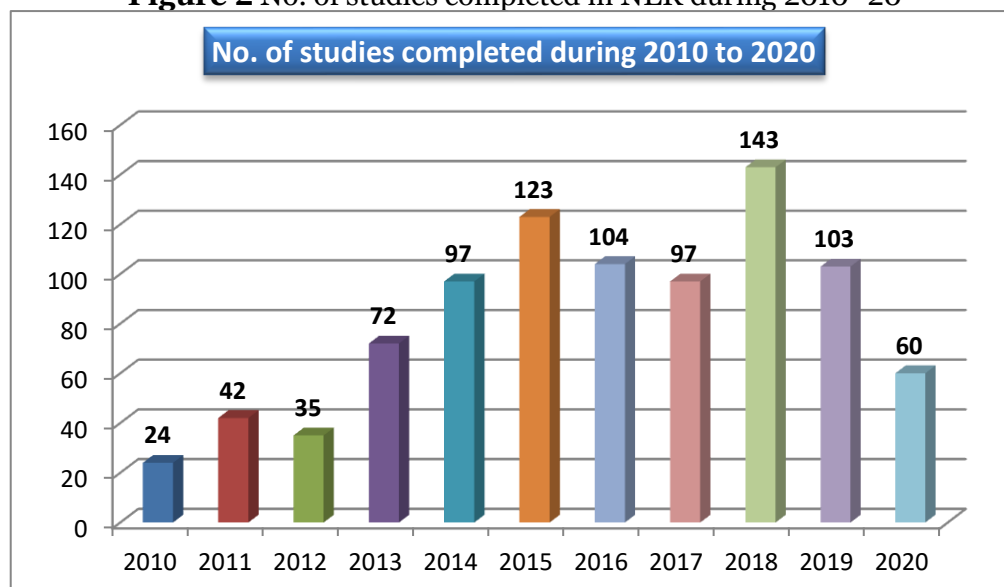

Figure 1 Number of studies completed in NER on various sectors during 2010–20

6.2 Historic trend of studies conducted in North Eastern Region

As per the data obtained from the database, the trend of the conduct of the studies on various sectors has shown a significant rise after 2014. The number of studies conducted per year was below 100 till 2014, whereas, it is observed that the number of studies conducted has increased from 2015 onwards. This analysis is based on the metadata of 900 reports collected during the first four months of this study. (refer to Annexure-1C: List of Studies Year Wise).

Figure 2 No. of studies completed in NER during 2010–20

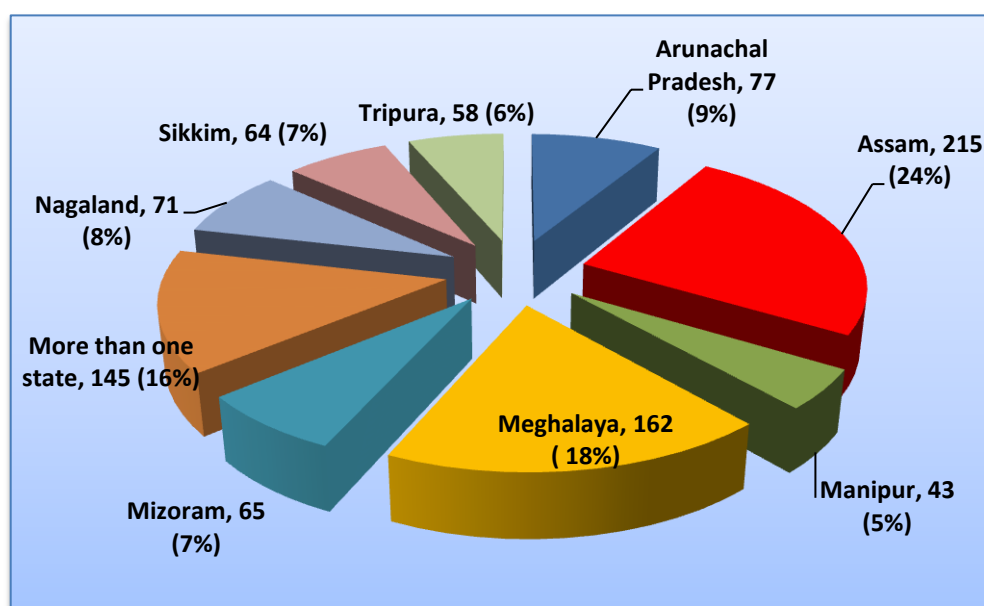

6.3 Significant number of studies done in Assam and Meghalaya

It is worth mentioning that majority of the the studies have been primarily focussed or implemented in two North Eastern states, that is, Assam and Meghalaya. Out of 900 completed study reports, 215 studies (24% of the total studies) have been focussed in Assam while 162 studies (18% of the total studies) have been focussed in Meghalaya.

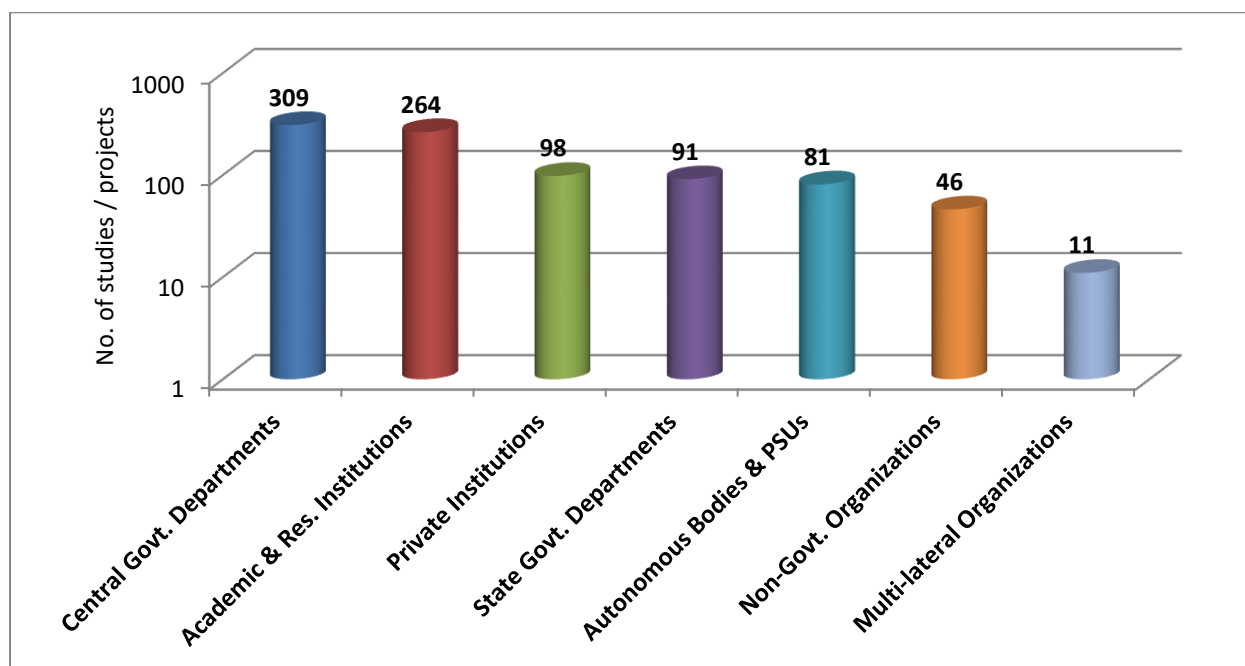

There are 145 such studies whose study area was more than one state or were conducted for all the North Eastern states. The percentage of such studies is 16% of the total studies conducted during 2010–20 period (refer to Annexure 1B: List of Studies State Wise).

Figure 3 Number of studies conducted in different states during 2010–20

6.4 Majority of studies implemented by Central Government Departments and research and academic institutions

As per the study reports collected, it was found that more than 250 organizations have implemented various studies in different parts of NER. These organizations have been categorized under seven major categories (as shown in Figure 4). The graph in the figure shows that a subsequent number of studies have been implemented by the organizations who come under Central Government Departments and research and academic institutions. Out of 900 study reports, it was observed that 309 studies have been implemented by the organizations which fall under the Central Government Departments category and 264 studies have been implemented by organizations which fall under research and academic institutions (refer to Annexure 1D: List of Studies Institutional Category Wise).

Figure 4 Number of studies implemented by different categories of institutions

6.5 Sector-wise historic trend of studies conducted during 2010–20

Table 3 shows the historic trend of the studies conducted on various sectors in NER during 2010–20 period. The information is based on the metadata of the 900 study reports collected and compiled during the last four months (February 2021 to May 2021). Keeping the historic data in view (Table 3), it is observed that a significant number of studies (363 studies) have been conducted under environment sector during the 2013–19. In 2018 in particular, 61 studies have been conducted under environment sector which is highest number in the last 10 years as compared to other sectors. Under agriculture & allied sector, there is not much variation found with regard to the number of studies conducted. It was observed that during the last 10 years the numbers of studies conducted under agriculture & allied sector are below 20 every year whereas the numbers of studies conducted in rest of the sectors are comparatively very less than environment and agriculture & allied sectors.

7.0 Ongoing projects

TERI project team has identified about 150 ongoing projects (Annexure 2) in the relevant areas from NER states and has collected information of these projects. Based on the information collected, it was observed that a significant number of studies have been awarded to Agriculture & Allied and Environment sectors compared to other sectors and it was also observed that most of the studies have been focussed on Assam. A list of studies sanctioned during 2010-2020 sector-wise, state-wise, study awarded year-wise and organizations' category-wise have been appended (Annexure-2, Annexure-2A; Annexure-2B, Annexure-2C, & Annexure-2D).

8.0 Challenges and Limitations of the Study

It is estimated that there are over 3000 sponsored studies conducted in the context of NER in various sectors during the 2010–20 period. Despite all efforts to achieve collection of more number of reports, the team was able to collect 1050 reports. While attempts were made in collecting full-text reports from various other sources, a few could not be received due to the following reasons:

- Principal investigators were transferred/no longer associated with the organization/retired/expired
- Project confidential/projects were not approved/projects were abandoned

Therefore, the strength of reports' collection for subsequent analysis will be purely based on the present collection of 1050 study reports.

Other challenges faced by the study team include:

- **Travelling/visits to different North Eastern states/institutions:**

Owing to widespread of pandemic across the country, visitors were not allowed to meet face to face, hence obtaining print copies of reports became a difficult task. The team overcame the issue, to large extent, through telephonic and video-conferencing facilities.

- **Incomplete information in study reports:**

Many study reports were made available in open domain. However, certain key information required for the study, such as 'study start date', 'year of completion', 'name of funding organization', 'contact details', and in some reports 'Recommendations' were found missing. To obtain such important missing pieces of information, the project team had to contact the respective principal investigators/heads of institutions. Getting this done was quite challenging during the pandemic period.

- **Internet connectivity in NER:**

Owing to poor internet connectivity, receiving soft copy of reports became challenging mainly due to time-consuming task of uploading/attaching voluminous reports in an e-mail/cloud. Keeping this situation in view, our NER team scanned a few important pages of the voluminous reports to fill in the metadata.

9.0 Conclusion

In the first phase of the study (27 January to 26 June 2021), TERI project team collected 900 completed study reports and listed out 150 ongoing studies from various implementing institutions, funding agencies, and online resources/websites. The collected data have been cleaned and categorized and metadata for subsequent compilation and analysis was prepared.

In the second phase beginning 27 June 2021, the project team will be conducting secondary and primary analysis through qualitative techniques; impact evaluation of the implementation of recommendations through key person interviews and focus group discussions; and preparation and submission of detailed study report.
